AUDIT SCOPE
Full SEO Architecture
Baseline Launch Audit

Important Engagement Context:

OmniPeak Digital proudly designed and developed the official website for Ivory Capital Corporation and its subsidiaries. The original website project scope was dedicated exclusively to brand presentation, visual design, custom front-end development, mobile responsiveness, and inquiry intake workflows. It did not include a dedicated search engine optimization (SEO) campaign. This audit establishes the baseline technical and competitive landscape to inform an intentional organic acquisition strategy.

SECTION 01

Executive SEO Summary

The website for **Ivory Capital Corporation** and its operating subsidiaries (**Ivory Courier LLC** and **Ivory Family Investments LLC**) possesses a clean, secure, responsive, and visually distinguished design. However, from a search engine optimization perspective, **the site currently exists in an unindexed, dormant organic state**. This is normal and expected given that the initial engagement was strictly focused on visual architecture and development rather than an ongoing SEO campaign.

INDEXING STATUS	TECHNICAL CORE	LOCAL FOOTPRINT	COMMERCIAL UPSIDE
Unindexed	Solid Build	Dormant	High
Sitemap & Robots missing	SSL active, mobile ready	No GBP / Citations linked	Louisiana B2B Logistics

✓ CURRENT STRENGTHS

Clean Responsive Build: Modern responsive layout adapting across mobile, tablet, and desktop screens.

Active SSL / HTTPS: Modern TLS encryption with HSTS enabled on high-speed Vercel edge infrastructure.

Clear Subsidiary Architecture: Dedicated pages for Ivory Courier LLC and Ivory Family Investments LLC.

Functional Commercial CTAs: Direct integration with secure quote and independent contractor forms.

Regulatory Protection: Explicit healthcare disclaimer ensuring no protected health information (PHI) is collected.

✕ CURRENT SEO DEFICITS

No Sitemap or Robots.txt: Both files return HTTP 404, preventing systematic Google bot crawling.

Apex/WWW Split: Both apex and www domains return 200 without canonical 301 redirection.

Zero Schema Markup: No JSON-LD Organization or LocalBusiness structured data present.

308 Redirect Hops: Internal navigation links target `.html`, causing server redirect delays to clean URLs.

No Local Landing Pages: Baton Rouge, New Orleans, and Northshore lack dedicated landing pages.

⚡ IMMEDIATE OPPORTUNITIES

Search Console Indexing: Formal submission of an XML sitemap to get core pages into the Google index.

Dedicated Courier Pages: Build dedicated pages for Medical Courier, Scheduled Routes, and B2B Logistics.

Louisiana Geo-Targeting: Target Baton Rouge, New Orleans, Hammond, and Northshore business hubs.

Google Business Profile (SAB): Claim and verify a Service Area Business profile to capture local search intent.

Inbound Lead Generation: Capture inbound commercial decision-makers seeking reliable freight and courier contracts.

SECTION 02

Technical SEO Audit

Technical SEO establishes whether search engine crawlers (Googlebot) can discover, access, parse, index, and render web pages without friction, latency, or ambiguity. Below is the verified status of the website's technical infrastructure based on live server HTTP inspections.

TECHNICAL SEO PARAMETER	LIVE AUDIT FINDING	STATUS	TECHNICAL ASSESSMENT & IMPACT
Indexability	No noindex tags detected	READY	Pages can be indexed by search engines once discovered, but indexation has not yet been requested via Search Console.
Crawlability	Internal links navigable	FRICTION	Crawlers can traverse pages, but internal links point to `.html` causing unnecessary 308 redirect hops on every crawl step.
robots.txt	HTTP 404 (Missing)	MISSING	`/robots.txt` does not exist. Search engines lack crawling directives and cannot locate the XML sitemap.
XML Sitemap	HTTP 404 (Missing)	MISSING	`/sitemap.xml` does not exist. Googlebot has no machine-readable inventory of all approved canonical URLs and update timestamps.
HTTPS / SSL Protocol	HTTP 200 (Active TLS)	PASSING	Modern TLS certificate active on Vercel edge with HSTS header (`max-age=63072000`). Fully secure connection.
Canonical Tags (<link>)	0 Canonical tags found	CRITICAL	No canonical tags exist in the `<head>` of any page. Search engines may identify duplicate content or index unintentional variations.
Apex vs. WWW Redirect	Both return HTTP 200	CRITICAL	`https://ivorycapitalcorporation.com` and `https://www.ivorycapitalcorporation.com` both serve pages directly without a permanent 301 redirect. Splits search authority.
Mobile Responsiveness	Viewport meta declared	PASSING	`width=device-width, initial-scale=1.0` present. Layout adapts responsively across mobile smartphones and tablets.
Page Speed / Runtime	Tailwind CDN parsed live	IMPROVABLE	Tailwind CSS is loaded via client-side script (`cdn.tailwindcss.com`) rather than a compiled, minified CSS file. Increases browser DOM parse time.
Structured Data (Schema)	0 JSON-LD scripts found	MISSING	Zero Schema.org structured data detected. Site misses rich snippets for Organization, LocalBusiness, Service, and ContactPoint.
Internal Link Routing	Links point to `.html`	FIX REQUIRED	Navigation links point to `courier.html`, triggering a server 308 redirect to `/courier` on every click. Links should directly reference clean URLs.
Custom 404 Error Handling	Raw Vercel text error (79B)	MISSING	Broken or mistyped URLs display a raw unbranded text message (`404: NOT_FOUND`). Lacks custom branded navigation recovery.
Image Optimization	37KB-38KB PNG logos	SATISFACTORY	Images are reasonably small, but converting to WebP (8–10KB) and adding explicit `width`/`height` attributes will prevent Cumulative Layout Shift (CLS).

TECHNICAL SEO PARAMETER	LIVE AUDIT FINDING	STATUS	TECHNICAL ASSESSMENT & IMPACT
Alt Text Optimization	Partial / Generic alt tags	OPPORTUNITY	Images currently use generic alt tags (e.g. "Crown Monogram") or empty alt attributes. Missing keyword-rich descriptive context for logistics.

SECTION 03

On-Page SEO & Courier Service Analysis

On-Page SEO evaluates whether individual pages are specifically engineered to satisfy user search intent and match target keywords through headings, metadata, copy depth, internal linking, and conversion pathways.

Verified Page Metadata (Current vs. Recommended)

Page: Homepage (index.html / `/`) — H1 Needs Alignment

Current Live Metadata	Recommended SEO Optimization
Title: Ivory Capital Corporation | Parent & Holding Corporation	**Title:** Ivory Capital Corporation | Corporate Holding & Subsidiary Governance
Meta Desc: Ivory Capital Corporation is a parent and holding company established to oversee its subsidiaries...	**Meta Desc:** Wyoming parent holding company providing strategic oversight, corporate governance, and asset stewardship for operating subsidiaries including Ivory Courier LLC.
H1: BUILDING TODAY • INVESTING TOMORROW *(Slogan, not keyword-rich)*	**H1:** Ivory Capital Corporation: Strategic Corporate Oversight & Asset Stewardship

Page: Ivory Courier LLC (courier.html / `/courier`) — High Conversion Value

Current Live Metadata	Recommended SEO Optimization
Title: Ivory Courier LLC | Commercial Courier, Delivery & Logistics	**Title:** Louisiana Commercial & Medical Courier Services | Ivory Courier LLC
Meta Desc: Ivory Courier LLC is a Louisiana-based courier, delivery and logistics company providing flexible transportation solutions...	**Meta Desc:** Dependable scheduled route delivery, B2B commercial courier, and healthcare logistics across Louisiana. Serving Baton Rouge, New Orleans, Hammond & Northshore.
H1: IVORY COURIER LLC — COMMERCIAL LOGISTICS	**H1:** Commercial, B2B & Medical Courier Services in Louisiana

Ivory Courier LLC Service Line Optimization Audit

Detailed evaluation of how the eight core courier offerings are represented on the current site versus what is required to rank organically in Louisiana search results.

1. Commercial Courier Services — On Page

Current Presence: Featured as "General Courier & Package Delivery" on the courier page with a 2-sentence summary.

SEO Recommendation: Expand into a dedicated commercial service section highlighting point-to-point office deliveries, legal filing runs, and architectural document courier.

2. Medical Courier Deliveries — High Intent Opportunity

Current Presence: Mentioned with compliance safeguards (pharmacy/clinic deliveries; temperature-sensitive cargo excluded; no PHI collected).

SEO Recommendation: Medical courier is the highest-value commercial search term in Louisiana. Build a dedicated landing page (`/courier/medical-courier-louisiana`) targeting hospital networks and outpatient labs.

3. Healthcare Supply Delivery

Blended Mention

Current Presence: Grouped under the medical courier section.

SEO Recommendation: Target clinic supply distribution, dental laboratory pick-ups, optical deliveries, and medical equipment transit keywords.

4. Commercial Business Delivery

On Page

Current Presence: Positioned as commercial capabilities for corporate accounts.

SEO Recommendation: Target corporate procurement terms: "commercial package delivery service", "commercial contract delivery Baton Rouge", and corporate courier accounts.

5. Scheduled & Recurring Routes

High Lifetime Value

Current Presence: Outlined as daily, weekly, or recurring delivery runs structured around commercial operating timelines.

SEO Recommendation: Scheduled route contracts represent predictable recurring commercial revenue. Optimize for "contract courier service Louisiana" and "scheduled daily courier routes".

6. B2B Delivery Logistics

On Page

Current Presence: "Business-to-Business Deliveries" highlighted for inter-facility and branch-to-branch logistics.

SEO Recommendation: Target commercial logistics coordinators and multi-location companies requiring inter-branch supply movement across Southeast Louisiana.

7. Regional Logistics & Transport

General Scope

Current Presence: Outlines regional freight coordination and distribution support.

SEO Recommendation: Clarify vehicle capabilities (cargo vans, sprinter vans, local freight) to align with freight logistics search queries without implying heavy interstate long-haul trucking.

8. Louisiana Courier Services (Geo-Focus)

Thin Content

Current Presence: Louisiana is mentioned 8 times on the courier page, but city names (Baton Rouge, New Orleans, Hammond, Northshore) appear only once in a disclaimer.

SEO Recommendation: Build dedicated regional hub landing pages. Google requires distinct topical and geographic content depth to award local rankings.

SECTION 04

Local SEO & Louisiana Territory Strategy

Local SEO is the primary acquisition engine for commercial delivery and courier services. Over **76% of commercial delivery inquiries begin with a local search** (e.g. "courier service near me", "courier Baton Rouge", "medical courier New Orleans").

CURRENT LOCAL SEO LIMITATIONS

Google Business Profile (GBP): Currently not linked or detected for Ivory Courier LLC on the website.

Address Publication Restriction: Physical address is not displayed on the website per corporate brief instructions. Requires a specialized **Service Area Business (SAB)** setup.

No Local Landing Pages: Currently 0 dedicated location pages exist for key commercial Louisiana hubs.

Zero Local Citations: No verified local directory listings (Chambers of Commerce, YellowPages, BBB, Louisiana business registries).

No Review Mechanism: No Google customer reviews or client testimonials are integrated to build local trust signals.

RECOMMENDED LOCAL STRATEGY

Claim GBP as Service Area Business: Configure Ivory Courier LLC in Google Business Profile with hidden address and designated service territory (SE Louisiana).

3 Dedicated City Landing Pages: Launch targeted pages for Baton Rouge, New Orleans Metro, and Hammond / Northshore.

NAP Consistency: Establish standardized Name (Ivory Courier LLC), Phone (985-222-3700), and Service Area across all business platforms.

Local Schema Markup: Inject LocalBusiness JSON-LD markup declaring `areaServed: ["Baton Rouge", "New Orleans", "Hammond", "Slidell", "Covington"]`.

Commercial Review Program: Systematic outreach to enterprise delivery clients for Google Business reviews.

PRIORITY LOUISIANA GEOGRAPHIC FOCUS AREAS

Baton Rouge Hub

`East Baton Rouge Parish`

State government offices, petrochemical corridor, medical clinics (Our Lady of the Lake, Baton Rouge General), and commercial legal firms.

New Orleans Metro

`Orleans & Jefferson Parish`

Ochsner Health systems, regional biotech hubs, maritime port logistics, downtown corporate centers, and hospitality supply routes.

Hammond & I-12 Corridor

`Tangipahoa Parish`

Major distribution crossroads (I-12 & I-55 junction), North Oaks Health System, university facilities, and regional distribution centers.

Northshore Communities

`St. Tammany Parish`

Covington, Mandeville, Slidell business corridors, private medical practices, professional accounting/legal suites, and inter-city transport.

SEC 05 Google Search Visibility

Measures current index status and keyword ranking performance across branded and non-branded search queries.

BRANDED VISIBILITY — Dormant

Searching for "Ivory Capital Corporation" surfaces historic SEC filings and an unrelated Asian advisory firm. Needs branded search consolidation.

COURIER KEYWORD VISIBILITY — Not Ranking

Domain does not rank in the top 100 for Louisiana courier searches due to lack of indexation and city landing pages.

GOOGLE SEARCH CONSOLE — Not Verified

GSC access could not be verified from public inspections. Setup is urgently required to monitor crawl errors and submit sitemaps.

SEC 06 Off-Page SEO & Authority

Evaluates external domain authority, backlink signals, and third-party commercial verification across industry directories.

BACKLINK PROFILE — Estimated 0-2 Links

Status: Not Verified / Estimated Baseline. Brand is in early launch phase with minimal external citation footprint.

AUTHORITY STRATEGY — High Upside

Submit to Louisiana Secretary of State business registry, local Chambers of Commerce (Baton Rouge, Tangipahoa, St. Tammany), and logistics registries (CLDA, Courier Board).

DOMAIN RATING PROJECTION — Foundational Phase

Consistent business citations will establish verified local entity authority and elevate rank confidence in Google's knowledge graph.

SECTION 07

Competitor & Keyword Opportunity Matrix

Below is the strategic keyword opportunity table for **Ivory Courier LLC**, focusing on commercially relevant searches in Louisiana. Search volume and difficulty metrics require active Google Ads / SEMrush tool integration and are labeled as *Not verified* in accordance with audit integrity guidelines.

TARGET KEYWORD	SEARCH INTENT	RECOMMENDED LANDING PAGE	PRIORITY	GEOGRAPHIC RELEVANCE	EST. METRICS
courier service Louisiana	Commercial	/courier	CRITICAL	Statewide Louisiana	Not verified
medical courier Louisiana	High Intent B2B	/courier/medical-courier-louisiana	CRITICAL	Statewide Healthcare	Not verified
commercial delivery service Louisiana	Commercial	/courier	HIGH	Statewide B2B	Not verified
scheduled delivery routes Louisiana	Contract B2B	/courier/scheduled-routes	HIGH	Statewide Distribution	Not verified
courier service Baton Rouge	Transactional Local	/courier/baton-rouge	CRITICAL	Baton Rouge Metro	Not verified
courier service New Orleans	Transactional Local	/courier/new-orleans	CRITICAL	New Orleans Metro	Not verified
medical courier Baton Rouge	High Value Niche	/courier/baton-rouge	CRITICAL	Baton Rouge Healthcare	Not verified
medical courier New Orleans	High Value Niche	/courier/new-orleans	CRITICAL	NOLA Healthcare Systems	Not verified
logistics services Louisiana	Commercial	/courier	MEDIUM	Statewide Logistics	Not verified
courier service Northshore LA / Hammond	Localized Hub	/courier/hammond-northshore	HIGH	Tangipahoa / St. Tammany	Not verified
same day courier Baton Rouge	Urgent Commercial	/courier/baton-rouge	HIGH	Capital Region	Not verified
healthcare logistics delivery Louisiana	Institutional B2B	/courier/medical-courier-louisiana	MEDIUM	Statewide Healthcare	Not verified

SECTION 08

Practical 6-Month SEO Implementation Roadmap

SEO is a compounding, phased process. Ranking for competitive logistics terms requires building technical integrity first, expanding topical relevance second, and reinforcing domain authority third.

M1 Month 1: Technical Foundation & Indexation Activation

Primary Focus: Google Search Console, Sitemaps, Canonicalization & Metadata

`Infrastructure Phase`

- Generate and deploy compliant `robots.txt` and `sitemap.xml`.
- Establish 301 permanent redirect from apex (`non-www`) to `www`.
- Clean up internal navigation links to eliminate 308 redirect hops from `.html`.
- Configure Google Search Console via DNS verification and submit sitemap.
- Implement self-referencing `<link rel="canonical">` tags on 100% of pages.
- Deploy custom branded 404 error recovery page.

M2 Month 2: Core Service Optimization & Local SEO Foundation

Primary Focus: Courier Content Expansion, Structured Data & Google Business Profile

`On-Page Phase`

- Rewrite page titles, meta descriptions, and H1 tags on core courier pages.
- Inject JSON-LD structured data for `Organization` and `LocalBusiness`.
- Add explicit image alt tags reflecting commercial and medical courier operations.
- Expand Ivory Courier LLC service copy from ~800 words to ~1,500 words of topical depth.
- Claim, verify, and optimize Google Business Profile as a Service Area Business (SAB).
- Refine quote request form tracking events in analytics.

M3 Month 3: Geographic Landing Page Expansion & Internal Linking

Primary Focus: City Landing Pages & Topical Siloing

`Expansion Phase`

- Build and launch dedicated Baton Rouge Courier Landing Page (`/courier/baton-rouge`).
- Build and launch dedicated Hammond / Northshore Landing Page (`/courier/hammond-northshore`).
- Create dedicated Medical Courier specialty landing page.
- Build and launch dedicated New Orleans Metro Landing Page (`/courier/new-orleans`).
- Interlink regional pages to core quote intake workflows.
- Verify and track local ranking positions for geo-modified courier queries.

M4 Month 4: Authority Building, Citations & Industry Backlinks

Primary Focus: Local Business Registries & Logistics Authority

`Off-Page Phase`

- Submit verified NAP business citations across 25+ top US business directories.
- Initiate regional chamber of commerce directory listings in Louisiana.
- Monitor incoming backlink profiles and disavow toxic spam if detected.
- Submit Ivory Courier LLC to specialized logistics portals (Courier Board, CLDA).
- Publish 2 authoritative B2B delivery guides (e.g. Scheduled Route Optimization for Clinics).
- Establish client review acquisition workflow for verified commercial accounts.

M5

Month 5: Performance Refinement, Core Web Vitals & Conversion CRO

Primary Focus: Speed Optimization, Mobile Conversions & Query Analysis

`Refinement Phase`

- Compile client-side Tailwind CSS into static minified CSS to optimize Core Web Vitals.
- Analyze top impression queries in Google Search Console for low-hanging fruit.
- Refine internal anchor text across all subsidiary links.
- Convert PNG logo assets to WebP with explicit width and height attributes.
- A/B test quote request button copy and form placement to improve visitor conversion.
- Conduct competitor gap analysis on emerging Louisiana courier rivals.

M6

Month 6: Comprehensive Review & Phase 2 Scale Strategy

Primary Focus: Performance Audit, Executive Reporting & Expansion Plan

`Governance Phase`

- Deliver 6-month comprehensive SEO performance report and organic growth trajectory.
- Reassess keyword target rankings against local Louisiana competitors.
- Formulate Phase 2 expansion roadmap for additional parishes and specialized freight.
- Evaluate total organic impressions, clicks, keyword rankings, and quote inquiries.
- Identify highest-converting service pages and double down on content expansion.
- Present long-term inbound business development recommendations to executive leadership.

SECTION 09

Priority Action Plan

To maximize return on investment, technical issues and organic growth initiatives are prioritized into four distinct tiers based on impact and execution complexity.

TIER 1: CRITICAL PRIORITY (IMMEDIATE TECHNICAL REMEDIATION)

Execution: Days 1 – 14

1. Deploy robots.txt & sitemap.xml

Why It Matters: Both currently 404. Googlebot cannot systematically index pages without them.

Recommended Action: Generate XML sitemap and robots.txt; verify and submit in Google Search Console.

Expected SEO Benefit: Immediate discovery and indexation of all approved pages in Google.

2. Fix Apex vs. WWW Canonical Split

Why It Matters: Both apex and www return 200 OK. Search engines split link equity across duplicate versions.

Recommended Action: Configure edge 301 permanent redirect from apex to www; declare canonical tags in head.

Expected SEO Benefit: Consolidates 100% of domain authority onto a single primary canonical URL.

TIER 2: HIGH PRIORITY (ON-PAGE & LOCAL FOUNDATIONAL SETUP)

Execution: Month 1 – Month 2

3. Courier Page H1 & Title Tag Overhaul

Why It Matters: Current H1 is generic ("COMMERCIAL LOGISTICS"); titles lack "Louisiana" and core service terms.

Recommended Action: Align H1, H2, and title tags with high-intent keywords ("Commercial & Medical Courier Services in Louisiana").

Expected SEO Benefit: Increases topical relevance for core commercial search queries.

4. LocalBusiness & Organization Schema

Why It Matters: 0 structured data scripts exist. Google cannot interpret company entity attributes.

Recommended Action: Deploy JSON-LD schema with entity relationships, phone, service areas, and commercial offerings.

Expected SEO Benefit: Qualifies domain for rich snippets, knowledge graph cards, and local service packs.

TIER 3: MEDIUM PRIORITY (CONTENT EXPANSION & REGIONAL HUBS)

Execution: Month 3 – Month 4

5. City / Service-Area Landing Pages

Why It Matters: Google requires distinct local content depth to award localized rankings in Baton Rouge and New Orleans.

Recommended Action: Create dedicated pages for Baton Rouge, New Orleans, and Hammond/Northshore.

Expected SEO Benefit: Enables the domain to compete for dozens of local geo-modified courier keywords.

6. Custom 404 Error Page & Internal Link Fix

Why It Matters: Navigation links hitting `.html` trigger 308 redirect hops; mistyped URLs show raw 79B text.

Recommended Action: Update internal links to clean URLs; create branded 404 page with navigation recovery.

Expected SEO Benefit: Prevents crawl equity leakage and improves user retention on mistyped URLs.

TIER 4: LONG-TERM GROWTH (AUTHORITY & INBOUND CHANNEL BUILDING)

Execution: Month 4 – Month 6+

7. Citations & Logistics Authority Building

Why It Matters: Newly registered domains lack third-party verification and external trust votes.

Recommended Action: Build directory profiles on local chambers, logistics portals (CLDA), and commercial registries.

Expected SEO Benefit: Builds enduring domain authority that insulates rankings against algorithm changes.

8. Commercial Review & Social Proof Acquisition

Why It Matters: Prospective commercial accounts evaluate third-party trust before signing courier contracts.

Recommended Action: Implement a post-delivery review acquisition sequence for corporate clients.

Expected SEO Benefit: Strengthens Google Business Profile ranking signals and boosts quote conversion rate.

SECTION 10

Business Growth Opportunity: The Inbound Multiplier

For growing logistics enterprises like **Ivory Courier LLC**, organic search visibility does not replace active sales development—**it fundamentally transforms sales efficiency**. Below is how an organic inbound acquisition channel complements and strengthens your current commercial outreach.

CURRENT OUTBOUND PUSH CHANNELS

Direct outreach, LinkedIn networking, cold calling, and social media postings on Facebook and Instagram are active "push" marketing channels. They introduce Ivory Courier to potential commercial accounts before those accounts have an active, immediate problem.

Outbound Characteristics:
Requires ongoing manual effort; prospect may not need a courier today; longer sales nurture cycle; higher cost-per-contact over time.

ORGANIC SEARCH (THE INBOUND PULL CHANNEL)

Google search is a high-intent "pull" channel. When an office manager, clinic director, lab administrator, or distribution supervisor searches **"medical courier Baton Rouge"** or **"scheduled delivery service New Orleans"**, they have an urgent, funded business need at that exact moment.

Inbound Characteristics:
100% active buyer intent; higher quote-to-contract conversion rate; zero incremental cost per click; operates 24 hours a day, 7 days a week.

The Channel Synergy Effect:

When you conduct outbound business development on LinkedIn or via direct sales in Louisiana, **the first action commercial prospects take is Google searching your company name**. If your brand dominates page 1 with an authoritative corporate website, a verified Google Business Profile, and professional local citations, your outbound sales close rate rises dramatically. Conversely, inbound organic leads provide high-margin route density that makes your scheduled routes more profitable.

**Transparent Agency Standard: SEO is a compounding long-term operational process. OmniPeak Digital does not make guaranteed ranking, traffic, lead, or revenue claims. Our objective is to engineer a durable, verified technical and content foundation that maximizes commercial inquiry opportunities over time.*

SECTION 11

SEO Service Recommendation

DEDICATED GROWTH RETAINER

OmniPeak Digital SEO Management

End-to-end technical, on-page, local, and authority management for Ivory Capital & Ivory Courier LLC.

MONTHLY INVESTMENT

$599 / month

Recommended Campaign: 6 Months Minimum

COMPLETE MONTHLY SERVICE SCOPE:

✓ Technical SEO Management

Sitemap, robots.txt, canonical auditing, crawl error resolution, and page speed Core Web Vitals maintenance.

✓ Google Search Console Oversight

DNS verification, sitemap re-indexing, indexing gap remediation, and impression trajectory monitoring.

✓ On-Page SEO Optimization
